

Our organic virgin pumpkin seed oil is produced from pumpkin seeds, grown organically in the south-west of France. Pumpkin was brought from the New World in the 16th century, and the pumpkin pips or seeds have been known since that time for their anti-inflammatory and anti-parasitic properties.

Squash, a variety whose seeds have few integuments, are cultivated with the aim of harvesting seeds. They are harvested using specially designed equipment, which allows the seeds to be separated from the pulp in the field, which is left on site and allows an immediate return to the field by limiting organic exports.

Botanical species

Cucurbita Pepo

Agricultural area

South West France

Sourcing type

Agriculture

Cultivation method

Organic

Agricultural diversity

Final process area

South West France (Perles de Gascogne)

Part used

Seed

Mode

First Cold Press

Additives

None

The seeds thus harvested are then washed and dried. A clear resurgence of interest in the consumption of pumpkin seeds in recent years has brought them new success. Our soils and our climate being perfectly compatible with this crop and its new outlets, its development contributes to the agricultural diversification of our countryside.

By product

Organic pumpkin seeds are rich in beneficial compounds, including their lipid fraction. This is why we wanted to offer a product that fully fits into our approach. We therefore cold press these seeds to extract an astonishing oil, respecting the organoleptic qualities and the natural beneficial components of the seeds.

Quality Criteria

Peroxide Index	< 15	meqO2/Kg
Acid Index	< 4	mg KOH/Kg
Saponification Index	185-195	Without

FATTY ACIDS COMPOSITION

UNSAPONIFIABLE

Rich in Vitamin E (majority γ tocopherols)

Rich in Beta-Carotene (anti-radical properties)

Also rich in phytosterols and lutein

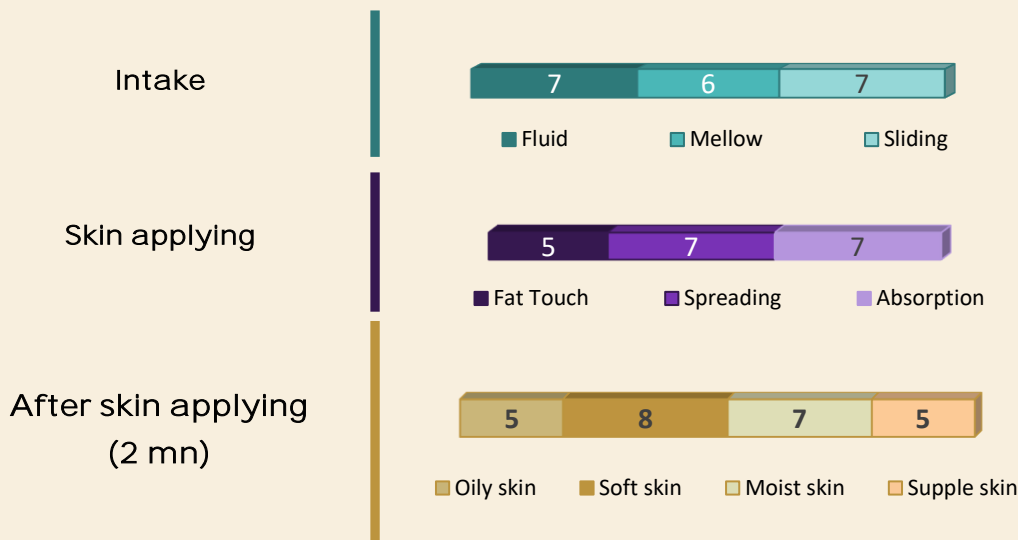

INCI Name
Cucurbita Pepo Seed Oil

Naturalness Indices According to ISO 16128
